

Call for Papers

Special Sessions in ICMFM 2017 at Hanoi, Vietnam

Technical Session on: “Recent Advances in Mechanics of Functional Materials: Theories, Experiments, and Computations”

This special session aims to promote collaboration among active researchers around the world, and to identify the challenging research problems in the new millennium, with a focus on physics-based modeling and simulation of heterogeneous material, such as biological and layered composite materials.

Technical Session on: “High Strain Rate Behaviors of Materials: Experiments and Modeling”

This special session aims to promote collaboration among active researchers around the world, and to identify the challenging research problems in the new millennium, with focus on multiscale experiments, and multiscale modeling including phenomenological, micromechanical and physics-based modeling approach under extreme loading conditions.

Chaired by
Prof. A.M. Rajendran, PhD
Chair and Professor
229A Carrier Hall
University of Mississippi
University MS 38677
Email: raj@olemiss.edu

Prof. Zhen Chen, PhD
C.W. LaPierre Professor of Engineering
E2504 Lafferre Hall
University of Missouri
Columbia, Missouri 65211, USA
Email: chenzh@missouri.edu

Submission Deadline: Before February 20, 2017

Acceptance Notification: On March 15, 2017

Registration Deadline: Before April 5, 2017

Conference Date: December May 8-10, 2017

Please submit your full paper or abstract using Easy Chair Submission system:
